Annual License Renewals

All licenses issued by the Board will expire on December 31, 2018. Licenses not renewed by that date will not be valid on January 1, 2019, and the licensee can not legally engage in any contracting activities, including bidding, quoting, contracting, obtaining permits or performing any work which requires a license. Practically every local permitting office across the state checks the status of the license before issuing a permit, and will deny the permit if the license is not current. They also have the authority to issue stop work orders on any job in progress if the license is not renewed.

Annual license renewals are set to begin on Monday, October 15, 2018. The Board has recently updated the licensing software, so the online renewal site will look a bit different than in years past, and the online renewal process will also be a bit different.

As in the past, paper renewal notices will be mailed to all currently active licensees, as well as licensees whose license expired in 2015, 2016 and 2017. The notices contain your username and password, in the event that you wish to renew online. Renewal notices are mailed to the address of record. Licensees are responsible for updating any change of address with the Board within 30 days of such change.

If you do not receive a renewal notice by October 31st and wish to renew by mailing a paper form to the office, please visit the Forms page of our website and download the appropriate form.

If you wish to renew online and did not receive a form with your username and password, please contact the Board's office for assistance.

Well Certification Exemption Requirements

Prior to 2009, licensed plumbing contractors who engaged in any activities involving a well needed a Class D Certification from the North Carolina Well Commission. However, in 2009, the General Assembly passed a bill which allowed licensed plumbing contractors to perform certain activities involving wells without the certification; however, in order to exercise this exemption, the plumbing contractor must have completed a Well Seal, Installation, Protection and Sanitation Class within the two years prior to the work being done.

The Education tab of the Board's website contains links to education providers who periodically offer the course.

PHCCNC is currently offering this two classes in October, with plans for a future class in the Raleigh area at a later date.

- Tuesday, October 23, 2018 - Fletcher, NC

- Tuesday, October 30, 2018 - Charlotte, NC

Changes to Exam Reference Materials

On January 1, 2019, the 2018 Edition of the North Carolina State Building Codes will become effective. This includes the Administrative Code and Policies, Energy Conservation Code, Mechanical Code, Fuel Gas Code, Plumbing Code and Residential Code.

The technical portions of the plumbing, heating, and fuel gas piping examinations have been updated to reflect any changes in the new codes. Examinees will need to bring the new code books to the testing center if testing on or after January 1, 2019. Those who may have taken and failed a technical exam prior to January 1st using the 2012 codes will be taking the updated exam based on the new codes.

The Fire Sprinkler Inspection Technician and Residential Fire Sprinkler Installation Contractor exams have also been updated to reflect changes in the NFPA Standards used as references.

Please visit the Exam Information page of the Board's website to view or download the updated Book Reference List.. Applicants should also read the important requirements regarding the materials that are required and allowed when testing. Individuals who arrive at the testing center with prohibited materials will not be allowed to take the exams and may face disciplinary action by the Board.

If you have any questions regarding reference materials, please contact the Board office for assistance. Please see page 2 of this newsletter

Changes to Exam Procedures Coming in 2019

For many years, examinees were required to wait up to two weeks after testing to receive their official results by mail. In mid-2018, the Board changed this policy and examinees began receiving their test results immediately upon completing the exam at the PSI testing center.

The Board has also changed the long-standing policy of requiring applicants to test at one of the seven PSI testing centers located in North Carolina. Applicants may now test at any PSI testing center in the nation. Those wishing to do so must include a note indicating this when submitting their application.

The biggest changes to examination policy will become effective on January 1, 2019. On that date, examinees will be required to bring all reference materials to the test site for their scheduled exam(s). This includes all code books, reference manuals, ductilators, etc. Please see the Exam Information page of our website for important requirements regarding exam reference materials. Applicants who appear at the testing center with prohibited materials will not be allowed to test and may face disciplinary action by the Board.

Emily Rabon Assumes Exam Coordinator Duties

Earlier this year, Karen Jolliffe retired after ten years of dedicated service to the Board, and specifically to the thousands of applicants that she assisted with the application and examination process. During her tenure, over four-thousand applicants earned licensure by the Board.

Emily Rabon, who joined the Board staff as a Receptionist / Office Assistant in October, 2016, has now assumed the duties of Exam Coordinator. As the first point of contact for callers and visitors to the Board's office, Emily became very familiar with the experience requirements and documentation, the application and examination process, and many other things related to licensure. As the Exam Coordinator, she will receive and process all examination applications and maintain communication with applicants, as well as coordinating and conducting exams and exam reviews.

Disciplinary Actions

The Board is required by law to investigate every complaint received. If the findings of the investigation indicate that a violation of the laws and rules enforced by the Board have occurred by a licensed or unlicensed individual and/or firm, a number of disciplinary actions are available to the Board.

Recent actions are reflected in the four reports that follow:

- Letter of Caution Report
- Consent Agreement Report
- Field Resolution and Resolution Review Committee Report
- Attorney's Report

Letter of Caution Report

Upon completion of investigations, a Letter of Caution can be issued to a licensee where it is determined through an investigation that a violation has occurred by one of our licensees. The Letter of Caution is issued to address and affirm issues they should improve upon or be more mindful of for future jobs:

Consent Agreement Report

A Consent Agreement is an affidavit taken from unlicensed individuals performing plumbing, heating and fire sprinkler work without a license. These individuals sign a Consent Agreement stating that they will not perform any work requiring a license until they are properly licensed to do so. If you see these individuals performing contracting activities in the field, please report them to this office.

Resolution Agreements

A Field Resolution Agreement is a voluntary agreement by which a licensee enters into some type of sanctions against their license instead of appearing before the Resolution Review Committee or the Full Board at a formal hearing. All of the Agreements are reviewed by a member of the Resolution Review Committee and then presented to a Board hearing panel for approval prior to the agreement being adopted as a final agency decision. If a complaint has not been resolved in the field through a Field Resolution Agreement, then the case can be referred to the Resolution Review Committee. During the Resolution Review Committee meeting, a licensee can enter into a Review Committee Resolution Agreement in place of appearing before the Board at a formal hearing; the agreement is then presented to a Board hearing panel for approval prior to the agreement being adopted as a final agency decision. Cases that cannot be resolved through the use of Field Resolution Agreements or Review Committee Resolution Agreements are forwarded to formal hearings before the Board. Listed below are the different agreements entered into by the field staff and the Resolution Review Committee that have been approved by the Board. The information below does not contain all of the facts or details of each case. Specific details of any of the following cases can be obtained by e-mail (information@nclicensing.org) or upon written request to the Board's office.
