Documentation of Applicant Experience

The Board currently issues 23 different licenses, 21 of which require documentation of hands-on experience. (Fire sprinkler installation and inspection contractors require nationally recognized certifications.)

If the applicant has gained part or all of the required experience under the supervision of a licensee of this Board, it is the supervising licensee's responsibility to complete the appropriate form at the request of the applicant on the Current / Past North Carolina Licensed Employer Statement, which is part of the application package. The applicant is responsible for entering his/her full name, and indicating which qualifications are being sought before giving the form to the licensee for completion.

The licensee verifying the experience is responsible for entering the employment dates, the details of the applicants duties while employed by the firm, the percentages of work that were service and repair or installation and design, and the total hours that the applicant performed installation, maintenance, service and repair. The licensee must also list his/her name, license number, firm name (if applicable) and the verification must be notarized.

From time to time, the Board receives a report from an applicant that a licensee is delaying or completely refusing the completion of the verification form. We also receive reports from licensees who question their role in verifying the experience of an applicant who they may not think would make a good licensee due to questions regarding their knowledge, skills, abilities or character.

The responsibility of the licensee is to honesty and accurately report the applicant's experience, regardless of their personal opinion of the applicant, and to do so in a timely manner following the applicant's request.

It is not the responsibility of the licensee to determine whether the applicant is qualified to be a licensee based on their personal knowledge or opinion of the applicants knowledge, skills, abilities or moral character.

The Board requires that all applicants include information on the application regarding any criminal charges or convictions, as well as requiring a comprehensive criminal background report to be submitted with the application. If the Board identifies any issues during the application review, the applicant is required to meet with the Board's review committee to explain the offenses in person. The review committee will determine if the applicant will be allowed to sit for the exam, will need to wait a certain period of time before testing, or will be denied the opportunity to test.

If an applicant reports a licensee who is unwilling to verify experience, the licensee will be contacted by a member of the Board's staff, and will be reminded of the responsibility to verify the experience. If the licensee continues to refuse the request, it may lead to disciplinary action by the Board.

If a licensee has information concerning the applicants work history, criminal history or moral character which he/she believes should be brought to the attention of the Board, the licensee should submit the concerns to the Board's Executive Director in writing immediately after completing the verification form.

The Board both recognizes and appreciates the vitally important role that licensees play in the industry by documenting and verifying the experience of applicants. To help insure the strength and integrity of the plumbing, HVAC, fuel piping and fire sprinkler trades into the future, it is extremely important for experienced contractors to both encourage and assist those who are interested in obtaining technician and/or contractor licensing in their respective trades.

Disciplinary Actions

The Board is required by law to investigate every complaint received. If the findings of the investigation indicate that a violation of the laws and rules enforced by the Board have occurred by a licensed or unlicensed individual and/or firm, a number of disciplinary actions are available to the Board. Recent actions are reflected in the four reports that follow:

- Letter of Caution Report
- Consent Agreement Report
- Field Resolution and Resolution Review Committee Report
- Attorney's Report

Letter of Caution Report

Upon completion of investigations, a Letter of Caution can be issued to a licensee where it is determined through an investigation that a violation has occurred by one of our licensees. The Letter of Caution is issued to address and affirm issues they should improve upon or be more mindful of for future jobs:

The name of Danny R. McManus Jr. was originally included in this report, which implied that he had been found to be engaging in contracting without a license. In fact, Mr. McManus did not personally engage in unlicensed work, but did sign an agreement as a representative of, and on behalf of, Union County Schools. In the agreement, Mr. McManus acknowledged that work was performed by a former employee who, although licensed by the Board, did not properly list his license as the qualifier for the school system as required by the Board's Laws and Rules. The Board staff apologizes to Mr. McManus for any unintended implication that may have resulted.

Resolution Agreements

A Field Resolution Agreement is a voluntary agreement by which a licensee enters into some type of sanctions against their license instead of appearing before the Resolution Review Committee or the Full Board at a formal hearing. All of the Agreements are reviewed by a member of the Resolution Review Committee and then presented to a Board hearing panel for approval prior to the agreement being adopted as a final agency decision. If a complaint has not been resolved in the field through a Field Resolution Agreement, then the case can be referred to the Resolution Review Committee. During the Resolution Review Committee meeting, a licensee can enter into a Review Committee Resolution Agreement in place of appearing before the Board at a formal hearing; the agreement is then presented to a Board hearing panel for approval prior to the agreement being adopted as a final agency decision. Cases that cannot be resolved through the use of Field Resolution Agreements or Review Committee Resolution Agreements are forwarded to formal hearings before the Board. Listed below are the different agreements entered into by the field staff and the Resolution Review Committee that have been approved by the Board. The information below does not contain all of the facts or details of each case. Specific details of any of the following cases can be obtained by e-mail (information@nclicensing.org) or upon written request to the Board's office.
